
PRODUCT INFORMATION

Gloss Varnish 1330

The main advantage of this varnish consists in a special binding agent combining a larger number of technical advantages in one product.

PROPERTIES

- Excellent gloss
- Low yellowing
- Fast through drying
- Short drying time
- Extraordinary piling properties
- Very good rub resistance
- Problem-free processing with or without water

Pile height and possible powder quantity depend on the amount of the coating as well as on the quality of the printing substrate. Very good piling properties (no blocking with normal coating) do not discharge the printer from his controlling obligation.

A slight drying assistance by IR drying enables faster processing.

This technical instruction sheet is designed for your information and reference. It is based on and conforms to our current knowledge. However as actual application is affected by many factors over which we have no control, we are not liable for printing failures.
